UNIT 5. LET'S TALK.

VOCABULARY

ACTIVITY 1:

Facebook and social networking

Task 1: Reading.

Read the text quickly. Why was Ivy Bean famous?

Research by a British anthropologist shows that the optimum number of friendships that the human brain can maintain is about 150. But that's in the real world. What happens on Facebook where the maximum number of 'friends' permitted is 5000? According to social networking statistics, the average Facebook user has 130 friends. Some people have a lot more.

Ivy Bean from Bradford in the north of England became Facebook's oldest known user at the age of 102 in 2008. She quickly started making friends and became an online celebrity. When she maxed out her 5000 friend count on Facebook Ms. Bean joined the Twitter website and continued her social networking. At the time of her death in July 2010, she had 4,962 friends on Facebook and more than 56,000 followers (including the Prime Minister's wife) on Twitter. Ms. Bean's last tweet was July 6 2010. It read, "Going to have my lunch now will be back later."

Task 2:

Read the text again and find these numbers. What do the numbers refer to?

150 - the optimum number of friendships

130

2008

2010

5000

4962

ACTIVITY 4:

Read the problems below and write some possible solutions.

Advice Column

problems about *computers*

- Read the problems below and discuss possible solutions.

Ask Anita!

Dear Anita,

Every morning I go to work, sit down and log on to my computer. I need my computer to do my job. But I have a problem. I love to go on Facebook when I think my boss isn't looking and find out what my friends are doing. I also spend about an hour at work each day chatting with friends on-line. Anita, my boss will be very angry if she finds out that I waste so much time. But sometimes my job is boring. What can I do?

Suzy

Dear Anita,

I bought my first laptop last week and I was so surprised at how much computer software costs. Anita, I have a friend who knows a lot about computers and he can get me computer software for free – but another friend says I shouldn't do this. It's not legal, and it's the same as stealing. I don't know what to do.

Mike

Dear Anita,

I have passwords for three e-mail accounts, for my blog, and for so many other websites where I need to sign in. I think I have about ten or twenty different passwords. Unfortunately, I sometimes forget some of them. I don't want to write them on paper, because I might lose it and another person would have all my passwords. I don't want to have the same password for everything, because that could also be dangerous. Any ideas or suggestions?

Tony
